

AJAYI OLUWASEYI

BACKEND DEVELOPER (PYTHON)

oluwaseyitemitope456@gmail.com | [GitHub](#) | [LinkedIn](#) | [Twitter](#) | [Portfolio](#) +2348108469203

SUMMARY

Passionate Backend Developer with a strong professional background in creating scalable web applications and adhering to open-source principles. Skilled in agile methodologies, writing clean code, and rapid project scaling. I am enthusiastically driven to deliver impactful solutions for dynamic projects.
Programmer in the day Gamer at night.

SKILLS

Front-End: JavaScript,, HTML5, CSS3, Bootstrap, Bulma

Back-End: Python, Flask, Django, SQLite3, PostgreSQL

Tools & Methods: Git, GitHub, Heroku, CI/CD, Netlify, Responsive Development, Chrome Dev Tools

Professional: Remote Pair-Programming, Teamwork, Mentoring, Collaborating, Communicating, Problem-Solving.

WORK EXPERIENCE

Freelancing

Backend Developer

Remote

- Delivered robust backend solutions tailored to client needs using Python.
- Designed and maintained scalable backend systems, ensuring optimal performance and functionality.

Yetti Technology (Nigeria)

Python Developer

Remote
September 2023– September 2024

- Responsible for developing and maintaining the backend system using the Django framework.
- Design, implement, and manage databases using SQL and PostgreSQL, ensuring efficient data storage and retrieval.
- Troubleshoot and resolved software issues, ensuring seamless performance.
- Contributed to code reviews, enhancing code quality and team standards.
- Built and tested RESTful APIs, integrating with front-end components.

Side Hustle (Nigeria)

Backend Web Developer

Remote
March – Sept 2023

- Created and documented APIs using Django and Python.
- Integrated third-party APIs to enhance the functionality of applications.
- Participated in agile sprints, standups, and retrospectives.
- Completed the Jobberman Skills program and received certification.
- I have earned certifications to demonstrate competence in Backend Web Development(Python).

AltSchool Africa

Backend Developer

Remote
May 2022– Jan 2023

- Integrated third-party APIs from external applications into the web platform, enhancing functionality.
- I worked on data structures, algorithms, authentication, and open-source projects.
- Built flexible, and reusable code for future use, optimizing development efficiency and maintainability.

HIGHLIGHTED PERSONAL PROJECTS

Backend Developer

[Auth Ease](#)— An open-source Django package offering a plug-and-play authentication system with OAuth and simple login features.

- **Stack:** Python, Django.
- **Live Link:** Available on the [PYPI website](#)

[Auth Ease API](#) — Documentation for the authease package. Available for testing and viewing of endpoints

- **Stack:** Python, Django, DRF, PostgreSQL.
- **Live Link**

[Link Ease](#) — A web application for simplifying link sharing with powerful URL shortening and QR code generation.

- **Stack:** Python, Flask, HTML/CSS3, BootStrap, and Bulma

[Buzz Bite](#) — A blog website with user authentication using JWT. Users can perform all CRUD operations on a blog post.

- **Stack:** Python, Flask, HTML/CSS3, BootStrap, JavaScript

[Student Management API](#) — Experience seamless school management with the Student Management API—enabling admin functions, student registrations, course creation, and a streamlined grading system.

- **Stack:** Python, Flask_restx, SQLITE3, Heroku, PostgreSQL

[Foondamate Coding Challenge](#) — The CLI application solves equations in a given format and returns the solution along with the steps taken to solve the equation

- **Stack:** Python, D.S.A and Git

[Stores Rest API](#)—Stores Rest API is a versatile solution that empowers businesses to manage their stores efficiently. This API facilitates the creation and management of store details, product information, and customer transactions.

- **Stack:** Python, Flask, Rest API, SQLite3

[Byte Blogger](#) — A blog web application that allows users to sign up, and perform all CRUD operations on the web.

- **Stack:** Python, Django, BootStrap, HTML/CSS3, Git, SQLITE3, PostgreSQL, Heroku

[Phonie](#) — A user-friendly signup page with password strength verification, providing a straightforward web solution to identify the service provider of any Nigerian mobile phone number.

- **Stack:** HTML, CSS, and Javascript

N/B: **CHECK [PORTFOLIO](#) OR [GITHUB](#) FOR MORE AWESOME PROJECTS!**

EDUCATION

AltSchool Africa

Apr 2022 – Jul 2023

Remote Full Stack Web Development Program, Full-Time

- Gained expertise in Git/GitHub workflows, remote pair programming, and international collaboration.
- Completed the comprehensive program and earned certification.

Real Care Model College

August 2015 – September 2021

SSCE, Science.

- Excelled in science subjects and actively participated in the robotics club.
- Demonstrated proficiency in time management and organizational skills by balancing academic responsibilities with involvement in extracurricular activities.
